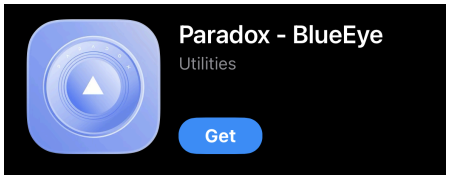
Adding BlueEye to Mobile

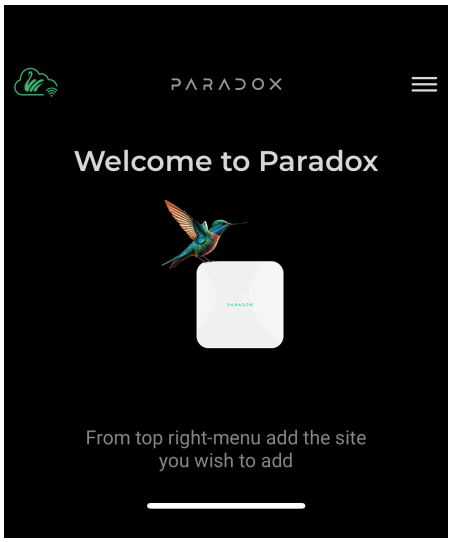
Step 1 - Downloading the app

-Download the BlueEye App from the App Store(Apple) or Google Play Store (Android)



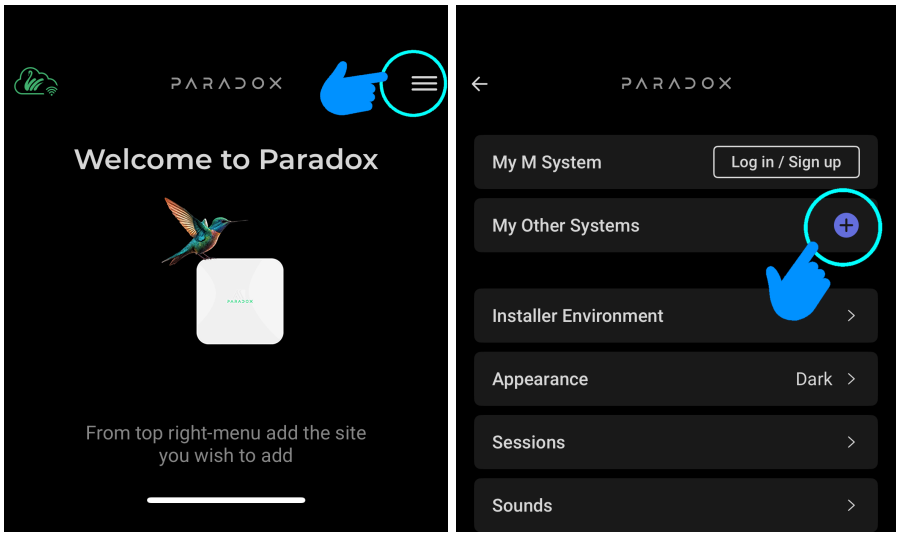
Step 2 - Opening The App

-Open the app and proceed through the first time Preferences and Privacy Policy. You can say NO to biometrics, and ALLOW on alerts and critical alerts
-You should now be on the homepage (See Below)



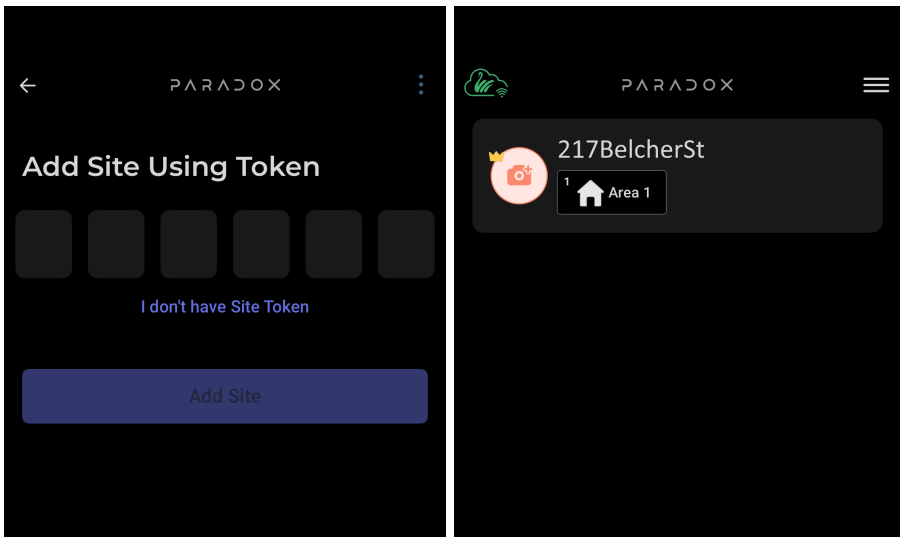
Step 3 - Adding Your Site

-Begin by pressing the triple bar in the top right, followed by the blue +



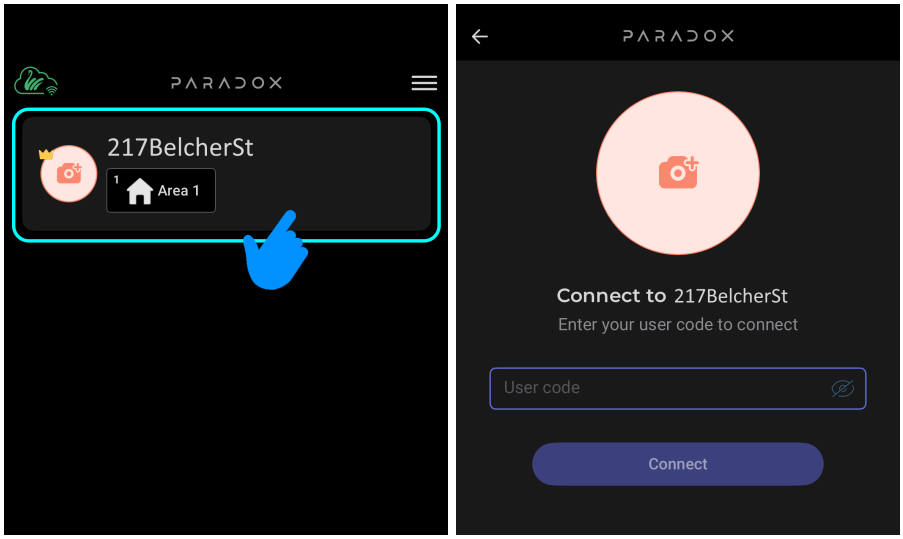
-Enter your 5 digit Site Token, and press “Add Site”

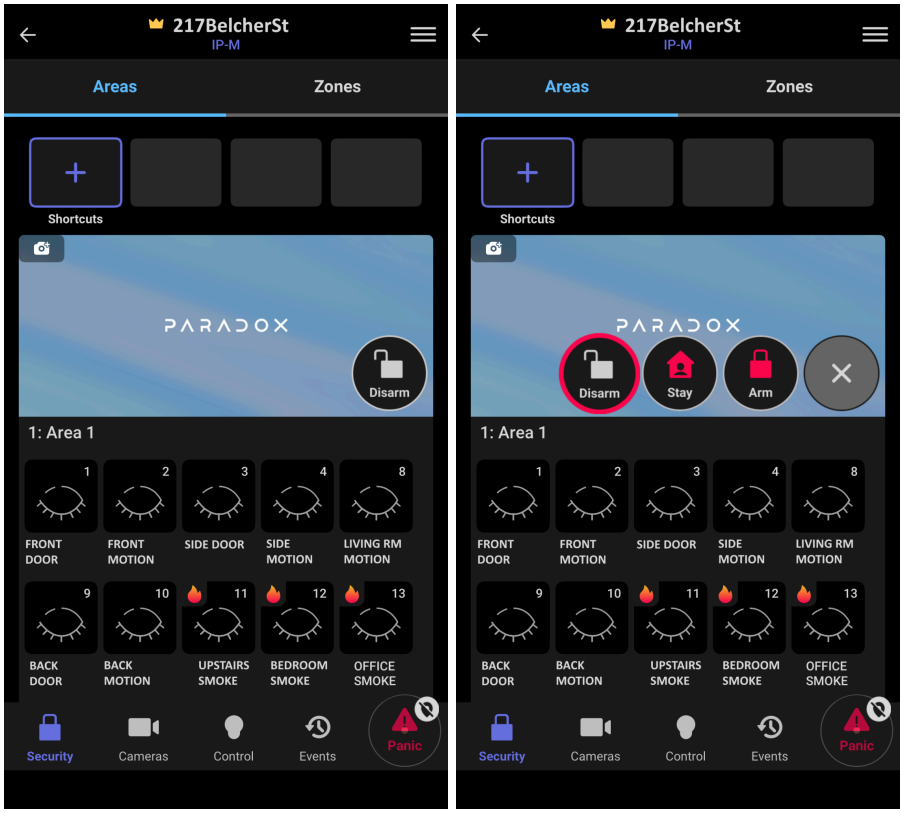
-This should return you to the home page, with your site added. This will be the page you’re always met with when opening the app, and is now ready to use



Step 4 - Logging In

-Tap anywhere in the gray site box
-Enter the 4 digit PIN you use on your keypad, then press “Connect”





-You are now connected to your site. Zones appear as eyeballs on the bottom of the screen, opening and closing in correspondence to zone state
-The “Disarm” button in the centre of the screen is the current system status, press it to switch the system between Disarmed, Armed, and Stay Armed
